

EGESIF on 1 March 2018 – agenda point on reporting on FI 2014-2020 programming period – background note

Following the second reporting exercise on FI which took place last year based on the data with the cut-off date of end of December the Commission will present the lessons learnt, frequently asked questions and some improvements to SFC to facilitate the quality of data submitted.

The agenda point will start with the presentation of the key inconsistencies identified in the reported data, and what the MA should pay attention to for the next reporting exercise.

Then presentation will continue with the frequently asked questions and respective replies. It will cover the question how to report data in the case of the guarantee instruments.

Based on the feedback and question received from the managing authorities there are certain improvements which will be introduced in the SFC2014. The overview of warning/blocking rules and fields moved from the fund level to the product level will be presented to the representatives of the Member State at the EGESIF. (The final level of detail is still to be confirmed after further discussion with the SFC team).

The point will conclude with the next steps and useful links, including to the key FI data on the Open Data Platform.
